UHID : AMHL.0002285870

: 25/01/2024

Date

Package : MEDIWHEEL - FULL BODY ANNUAL PLUS CHECK ADVANCE FEMALE HCK AHC No ; AMHLAH193159

SPECIMEN ADEQUACY:

Satisfactory for evaluation with endocervical cells and Metaplastic cells INTERPRETATION/RESULT:

Negative for intraepithelial lesion or malignancy,with no organism

Dense mixed inflammation is also present

ECG

SINUS RHYTHM. "RSR" IN V1.

TREADMILL TEST / STRESS TEST

STRESS TEST IS NEGATIVE FOR PROVOCABLE MYOCARDIAL ISCHAEMIA.

ULTRASOUND SCREENING WHOLE ABDOMEN

* Grade I fatty liver.

[NOTE: At times pelvic structures are not well visualized due to inadequate patient preparation / excess bowel gas shadow. However suggested clinical correlation and other investigations if clinically indicated.]

X-RAY CHEST PA

Chest skiagram does not reveal any significant abnormality.

X-RAY MAMMOGRAPHY BILATERAL (MHC)

Equal density gently lobulated lesion in left breast as described above.

Bilateral benign vascular calcification.

Assessment & Recommendation : BIRADS Category 3 . Suggested further evaluation by USG.

BIRADS Category: (0.Requires additional evaluation, 1.Negative, 2. Benign findings,3. Intermediate, 4. Suspicious malignancy, 5. Highly suggestive of malignancy,

6. Histologically proven malignancy).

Please Note :

False negative mammogram is 10-15%. Dense breast parenchyma may obscure an underlying neoplasm.

AICVD RISK SCORE REPORT								
RISK STATUS	YOUR SCORE	ACCEPTABLE SCORE						
Low Risk	4	6						

Your cardiovascular disease risk in the next 10 years is within the Normal limits for your age and gender

The AICVD risk score developed by Apollo Hospitals is a novel artificial intelligence -based risk scoring system that predicts your risk of having Coronary Artery Disease (CAD) related events in the next ten years. This scoring system uses Indian data and has been validated by multiple national and international institutions. This risk score is more than 92% accurate and has been compiled based on your physical parameters, heart health attributes, lifestyle and medical history. **Note:** The risk category is determined through the ratio between guest score and acceptable score at multiple decimal points. The outputs are shown in whole numbers.

Based on your AICVD risk score you are advised the following:

- Follow the guidance and education on lifestyle and dietary management provided through the ProHealth program. Maintain a healthy BMI (<25). Avoid tobacco in any form and if you are a smoker, stop smoking.
- Continue with medications for high blood pressure, diabetes, or dyslipidemia, if advised by your physician. Maintain HbA1c <7% (<53mmol/mol), blood pressure <140/90mmHg.
- Follow your physician's advice regarding follow up tests, consults and annual health assessment

DISCLAIMER

- 1. This is not a diagnostic tool and it does not guarantee accuracy of the result and cannot be acted upon independently.
- 2. This risk score and clinical algorithm is a general guideline for physicians. Any additional laboratory investigations, diagnostic imaging, treatment or patient education related to lifestyle management is under the physician's or cardiologist's discretion.
- 3. To ensure the information in the report is up to date, accurate and correct, doctor shall be consulted for interpretation of the report.
- 4. Apollo Hospitals and its staff does not offer any assurance on the information made available or be liable for any loss or damage as the said report is based on the AICVD risk score without any intervention from their side.
