Reg. No. : 40300709515 **Reg. Date** : 08-Mar-2024 10:42 **Ref.No** : **Approved On** : 08-Mar-2024 12:12

Collected On

: 08-Mar-2024 10:42

Name : SHRUTI NALINBHAI PARIKH

Age : 35 Years Gender: Female Pass. No. : Dispatch At :

Ref. By : Tele No. :

Location : SPECTRA DIAGNOSTIC @ LP SAVANI ROAD

Test Name	Results	Units	Bio. Ref. Interval	
THYROID FUNCTION TEST				
T3 (triiodothyronine), Total Method:CLIA	1.30	ng/mL	0.6 - 1.81	
T4 (Thyroxine),Total Method:CLIA	9.1	μg/dL	4.5 - 12.6	
TSH (Ultra Sensitive) Method:CLIA	2.656	μIU/mL	0.55 - 4.78	

Sample Type:Serum

Comments:

Thyroid stimulating hormone (TSH) is synthesized and secreted by the anterior pituitary in response to a negative feedback mechanism involving concentrations of FT3 (free T3) and FT4 (free T4). Additionally, the hypothalamic tripeptide, thyrotropin-relasing hormone (TRH), directly stimulates TSH production. TSH stimulates thyroid cell production and hypertrophy, also stimulate the thyroid gland to synthesize and secrete T3 and T4. Quantification of TSH is significant to differentiate primary (thyroid) from secondary (pituitary) and tertiary (hypothalamus) hypothyroidism. In primary hypothyroidism, TSH levels are significantly elevated, while in secondary and tertiary hypothyroidism, TSH levels are low.

TSH levels During Pregnancy:

First Trimester: 0.1 to 2.5 μIU/mL
 Second Trimester: 0.2 to 3.0 μIU/mL
 Third trimester: 0.3 to 3.0 μIU/mL

HEMOGLOBIN A1c TEST

6.2-7 : N	8 : Action Suggested 7-8 : Good control < 7 : Goal ear Normal Glycemia ! : Non-diabetic Level

Mean Blood Glucose 109.1 mg/dL 80.0 - 140.0

Importance of HbA1c - Glycated Hb. in Diabetes Mellitus

 HbA1c, also known as Glycated Hemoglobin is the most important test for the assessment of long term blood glucose control (also called glycemic control)

 HbA1c reflects mean blood glucose concentration over past 6-8 weeks and provides amuch better indication of long term glycemic control than blood glucose determination

• HbA1c is formed by non-enzymatic reaction between glucose and Hb., this reaction is irreversible and therefore remains unaffected by short term fluctuations in blood glucose levels.

• Long term complications of diabetes such as retinopathy-eye complications, nephropathy-kidney complications and neuropathy-nerve complications, are potentially serious and can lead to blindness, kidney failure etc.

• Glycemic control monitored by HbA1c measurement using HPLC method-(Gold Standard) is considered most important. (Ref. National Glycohemoglobin Standardization Program - NGSP).
