BIOCHEMISTRY

TestName(S)	Result	Unit	Biological Ref. Range	Method
-------------	--------	------	-----------------------	--------

RENAL FUNCTION TEST

Serum Urea	18.61	mg/dl	15-40	
Serum Creatinine	0.98	mg/dl	0.6-1.4	

Interpretation :-

Renal function tests (RFT) are a group of tests that may be performed together to evaluate kidney [kidney](https://www.physio-pedia.com/Kidney) (renal) function. The tests measure levels of various substances, including several minerals, [electrolytes](https://www.physio-pedia.com/Electrolytes), proteins, and glucose (sugar), in the blood to determine the current health of the kidneys. If the kidneys are not functioning properly, waste products can accumulate in the [blood](https://www.physio-pedia.com/Blood_Physiology) and fluid levels can increase to dangerous volumes, causing damage to the body or a potentially life-threatening situation. Numerous conditions and diseases can result in damage to the kidneys. The most common causes of and main risk factors for kidney disease are [diabetes](https://www.physio-pedia.com/Diabetes) and [hypertension](https://www.physio-pedia.com/Hypertension).

Liver Function Test

Bilirubin - Total	0.78	mg/dl	0.1-1.2	Jendrassik & Grof
Bilirubin - Direct	0.24	mg/dl	0.0-0.4	Jendrassik & Grof
Bilirubin - Indirect	0.54	mg/dl	0.1-1.0	Calculated
SGPT	27.85	IU/L	05-40	Kinetic UV

Interpretation :-
