## CONDITIONS OF REPORTING

### SEA BIRD MEDICARE CENTRE (DIVISION OF SEA BIRD MEDICARE PVT LTD)

1. Individual Laboratory Investigation should not be considered as conclusive and should be used along with other relevant clinical examination to achieve the final diagnosis. The reported results are for the information of the referring doctors only.
2. The test results relate only to the item/ items in our laboratory.
3. The values of a laboratory investigation are dependent on the quality of sample as well as the assay procedure used.
4. For test performed on specimens received from other locations (within and outside Mumbai), it is presumed that the specimen belongs to the patient named or identified, such verification having been carried out at the point of generation of the said specimen(s).
5. Electronic images in the report are created by electronic processing. Sea Bird Medicare Centre makes no expressed or implied warranties or representations with respects to it and takes no responsibility for the authenticity, quality and size of the image, affected possibly due to a computer virus or other contamination.
6. Sea Bird Medicare centre confirms that all tests have been carried out with reasonable care, clinical safety and technical integrity
  - A. However due to certain factors such as reagent inconsistency, machine breakdown etc. beyond its control which could affect the testing, it does not make any representation or give any warranty about the accuracy of the reported results.
  - B. The test results are to be used for help in diagnosing/treating medical disease & not for forensic applications. Hence these results cannot be used for medico-legal purpose
7. Since Sea Bird Medicare Centre does not verify the identify or the details of the customer except in case of certain tests, it cannot be held responsible for any misrepresentation or misuse.
8. Partial reproduction of this report is not valid and should not be resorted to.
9. Any query from referring doctor pertaining to this report should be directed to Sea Bird Medicare Centre.
10. All dispute / claims concerning to this report are subject to Mumbai jurisdiction only.

## REPORT

### Glycosylated Haemoglobin (HbA1c)

Test	Result	Units	BIOLOGICAL REFERENCE INTERVAL
HbA1c	6.11	%	< 5.7
Non-diabetic : $\leq$ 5.7 % Pre-Diabetic : 5.7 - 6.4 % Diabetic : $\geq$ 6.5 (EDTA Whole Blood, Turbidimetric)			
Mean Blood Glucose (MBG)	140.22	mg/dl	

#### Interpretation & Remark:

- HbA1c is used for monitoring diabetic control. It reflects the estimated average glucose (eAG).
- HbA1c has been endorsed by clinical groups & ADA (American Diabetes Association guideline 2022, for diagnosis of diabetes using a cut-off points of 6.5 %.
- Trends in HbA1c are a better indicator of diabetic control than a solitary test.
- Low glycated haemoglobin (below 4%) in a non-diabetic individual are often associated with systemic inflammatory diseases, chronic anaemia (especially severe iron deficiency & haemolytic), chronic renal failure and liver diseases. Clinical correlation suggested.
- To estimate the eAG from the HbA1C value, the following equation is used :  $eAg(mg/dl) = 28.7 * A1c - 46.7$ .
- Interference of Haemoglobinopathies in HbA1c estimation.
  - For Hb > 25%, an alternate platform (Fructosamine) is recommended for testing of HbA1c.
  - Homozygous hemoglobinopathy is detected, fructosamine is recommended for monitoring diabetic status.
  - Heterozygous state detected (D10/ Tosha G8 is corrected for HbS and HbC trait).
- In known diabetic patients, following values can be considered as a tool for monitoring the glycemic control.
  - Excellent Control - 6 to 7 %
  - Fair to Good Control - 7 to 8 %
  - Unsatisfactory Control - 8 to 10 %
  - and Poor Control - More than 10 %

## CONDITIONS OF REPORTING

### SEA BIRD MEDICARE CENTRE (DIVISION OF SEA BIRD MEDICARE PVT LTD)

1. Individual Laboratory Investigation should not be considered as conclusive and should be used along with other relevant clinical examination to achieve the final diagnosis. The reported results are for the information of the referring doctors only.
2. The test results relate only to the item/ items in our laboratory.
3. The values of a laboratory investigation are dependent on the quality of sample as well as the assay procedure used.
4. For test performed on specimens received from other locations (within and outside Mumbai), it is presumed that the specimen belongs to the patient named or identified, such verification having been carried out at the point of generation of the said specimen(s).
5. Electronic images in the report are created by electronic processing. Sea Bird Medicare Centre makes no expressed or implied warranties or representations with respects to it and takes no responsibility for the authenticity, quality and size of the image, affected possibly due to a computer virus or other contamination.
6. Sea Bird Medicare centre confirms that all tests have been carried out with reasonable care, clinical safety and technical integrity
  - A. However due to certain factors such as reagent inconsistency, machine breakdown etc. beyond its control which could affect the testing, it does not make any representation or give any warranty about the accuracy of the reported results.
  - B. The test results are to be used for help in diagnosing/treating medical disease & not for forensic applications. Hence these results cannot be used for medico-legal purpose
7. Since Sea Bird Medicare Centre does not verify the identify or the details of the customer except in case of certain tests, it cannot be held responsible for any misrepresentation or misuse.
8. Partial reproduction of this report is not valid and should not be resorted to.
9. Any query from referring doctor pertaining to this report should be directed to Sea Bird Medicare Centre.
10. All dispute / claims concerning to this report are subject to Mumbai jurisdiction only.

## REPORT

### Prostate-Specific Antigen Test

Test	Result	Units	BIOLOGICAL REFERENCE INTERVAL
TOTAL PSA	1.43	ng/ml	Please refer to 'NOTES' below.

PRINCIPLE: The assay principle combines a two-step enzyme immunoassay sandwich method with a final fluorescent detection (ELFA) by fully automated MINI VIDAS Analyser.

NOTES:

REFERENCE RANGE AS PER AGE:

Age	PSA Concentration
<40 Years	0.21 to 1.72 ng/ml
40-49	0.27 to 2.19 ng/ml
50-59	0.27 to 3.42 ng/ml
60-69	0.22 to 6.16 ng/ml
>60	0.21 to 6.77 ng/ml

INTERPRETATION: PSA is used as a tumor marker to screen for and to monitor prostate cancer. Elevated levels of PSA are associated with prostate cancer, but they may also be seen with prostatitis and benign prostatic hyperplasia. PSA levels tend to increase in all men as they age. If prostate cancer is diagnosed, the total PSA test may be used as a monitoring tool to help determine the effectiveness of treatment. It may also be ordered at regular intervals after treatment to detect recurrence of the cancer. Concentrations of total PSA between 4.0 ng/ml and 10.0 ng/ml are often referred to as the gray zone. It is in this range that the free PSA is the most useful. When men in the gray zone have decreased levels of free PSA, they have a higher probability of prostate cancer; when they have elevated levels of free PSA, the risk is diminished. The ratio of free to total PSA can help the doctor decide whether or not a prostate biopsy should be performed.

## CONDITIONS OF REPORTING

### SEA BIRD MEDICARE CENTRE (DIVISION OF SEA BIRD MEDICARE PVT LTD)

1. Individual Laboratory Investigation should not be considered as conclusive and should be used along with other relevant clinical examination to achieve the final diagnosis. The reported results are for the information of the referring doctors only.
2. The test results relate only to the item/ items in our laboratory.
3. The values of a laboratory investigation are dependent on the quality of sample as well as the assay procedure used.
4. For test performed on specimens received from other locations (within and outside Mumbai), it is presumed that the specimen belongs to the patient named or identified, such verification having been carried out at the point of generation of the said specimen(s).
5. Electronic images in the report are created by electronic processing. Sea Bird Medicare Centre makes no expressed or implied warranties or representations with respects to it and takes no responsibility for the authenticity, quality and size of the image, affected possibly due to a computer virus or other contamination.
6. Sea Bird Medicare centre confirms that all tests have been carried out with reasonable care, clinical safety and technical integrity
  - A. However due to certain factors such as reagent inconsistency, machine breakdown etc. beyond its control which could affect the testing, it does not make any representation or give any warranty about the accuracy of the reported results.
  - B. The test results are to be used for help in diagnosing/treating medical disease & not for forensic applications. Hence these results cannot be used for medico-legal purpose
7. Since Sea Bird Medicare Centre does not verify the identify or the details of the customer except in case of certain tests, it cannot be held responsible for any misrepresentation or misuse.
8. Partial reproduction of this report is not valid and should not be resorted to.
9. Any query from referring doctor pertaining to this report should be directed to Sea Bird Medicare Centre.
10. All dispute / claims concerning to this report are subject to Mumbai jurisdiction only.

## REPORT

### THYROID FUNCTION TEST

Test	Result	Units	BIOLOGICAL REFERENCE INTERVAL
TSH	5.86	μIU/ml	0.25-5 μIU/ml
T3	1.43	nmol/l	0.92-2.33 nmol/l
T4	73.55	nmol/l	60-120 nmol/l

The assay principle combines an enzyme immunoassay competition method with a final fluorescent detection (ELFA).

#### INTERPRETATION

**TSH** : A high TSH result often means an under active thyroid gland that is not responding adequately to the stimulation of TSH due to some type of acute or chronic thyroid dysfunction. A high TSH value can also occur when someone with a known thyroid disorder or who has had their thyroid gland removed is receiving too little thyroid hormone medication. A low TSH result can indicate an over active thyroid gland (hyperthyroidism) or excessive amounts of thyroid hormone medication in those who are being treated for an under active (or removed) thyroid gland. An abnormal TSH test result is usually followed by additional testing to investigate the cause of the increase or decrease.

**T3** : Triiodothyronine T3 contributes significantly to the maintenance of the euthyroid state, and the total T3 concentration has a role in screening for thyroid disease. In conjunction with other tests, T3 alone cannot diagnose hypothyroidism, but it may be more sensitive than thyroxine (T4) for hyperthyroidism.

**T4** : Thyroxine accounts for at least 90% of circulating protein-bound iodine. While >99.9% of T4 is protein-bound, primarily to thyroglobulin (TBG), it is the free fraction that is biologically active. In most patients the total T4 level is a good indicator of thyroid status, however it can sometimes be inadequate, and diagnostic efficiency may be improved by use of a total T4 test in conjunction with other tests.

### USG ABDOMEN AND PELVIS

**LIVER:** Liver appears normal in size 13.5 cm and **shows diffuse increased echotexture.** There is no intra-hepatic biliary radical dilatation. No evidence of any focal lesion.

**GALL BLADDER:** Gall bladder is distended and appears normal. Wall thickness is within normal limits. There is no evidence of any calculus. Portal vein is normal. CBD is normal.

**PANCREAS:** Pancreas appears normal in echotexture. There is no evidence of any focal lesion or calcification. Pancreatic duct is not dilated.

**KIDNEYS:** Both kidneys are normal in shape and echotexture. Corticomedullary differentiation is maintained. There is no evidence of any hydronephrosis, hydroureter or calculus.

Right kidney measures 10.3 x 5.0cm. Left kidney measures 11.0 x 5.6 cm.

**SPLEEN:** Spleen is normal in size, shape and echotexture. No focal lesion is seen.

**URINARY BLADDER:** Urinary bladder is distended and normal. Wall thickness is within normal limits.

**PROSTATE:** Prostate is normal in size measuring 3.2 x 3.7 x 3.4cm (23gm) and echotexture. No evidence of any focal lesion.

No free fluid or significant lymphadenopathy is seen.

**IMPRESSION:** Fatty liver grade I.

**Advice:** Clinical co-relation and further evaluation.
