Blood Group & RH Factor

SPECIMEN	WHOLE BLOOD
ABO GROUP	'A'
RH FACTOR	POSITIVE
INTERPRETATION	

The ABO system consists of A, B, AB, and O blood types. People with type AB blood are called universal recipients, because they can receive any of the ABO types. People with type O blood are called universal donors, because their blood can be given to people with any of the ABO types. Mismatches with the ABO and Rh blood types are responsible for the most serious, sometimes life-threatening, transfusion reactions. But these types of reactions are rare.

Rh system

The Rh system classifies blood as Rh-positive or Rh-negative, based on the presence or absence of Rh antibodies in the blood. People with Rh-positive blood can receive Rh-negative blood, but people with Rh-negative blood will have a transfusion reaction if they receive Rh-positive blood. Transfusion reactions caused by mismatched Rh blood types can be serious.

Patient Name : MR MACHCHHINDRA DALAVI	Gender : Male
Age : 32 Y	Date : 11/03/2024
Referring Doctor : APEX HOSPITAL	Patient ID :

X-RAY CHEST PA VIEW (PORTABLE)

FINDINGS:

Normal bronchovascular markings in bilateral lung fields.

Bilateral hila are normal.

Trachea appears normal.

Cardiac shadow is within normal limits.

The domes of diaphragm are normal in position and shows smooth outline.

Bilateral costophrenic angles are clear.

Visualized bones are grossly normal.

Visualised soft tissue shadows are normal.

IMPRESSION:

- No significant abnormality detected

REF.BY : MEDIWHEEL

USG ABDOMEN AND PELVIS SONOGRAPHY

Liver is of normal size and show normal echo texture. No evidence of focal lesion in Liver. Portal vein appears normal, No dilated I.H.B.R. No evidence pleural effusion.

Gall bladder is well distended. No Evidence of cholelithiasis.

C.B.D appears normal, and No evidence of calculi in it.

Pancreas shows normal echogenicity. No signs of acute or chronic Pancreatitis.

Spleen shows normal echogenicity and it is of normal size.
No evidence of Para aortic Lymphadenopathy or Ascites.

Right kidney measures : 8.9 x 3.1 cm.

Left kidney measures : 8.9 x 5.2 cm.

No evidence of renal calculi or Hydronephrosis. No evidence of S.O.L.
Cortical echogenicity on ether side appears normal.

No dilated upper or lower ureters are seen.
Bladder empty.

Prostate obscured.

Normal in size and echotexture.No focal lesion.

REMARK :

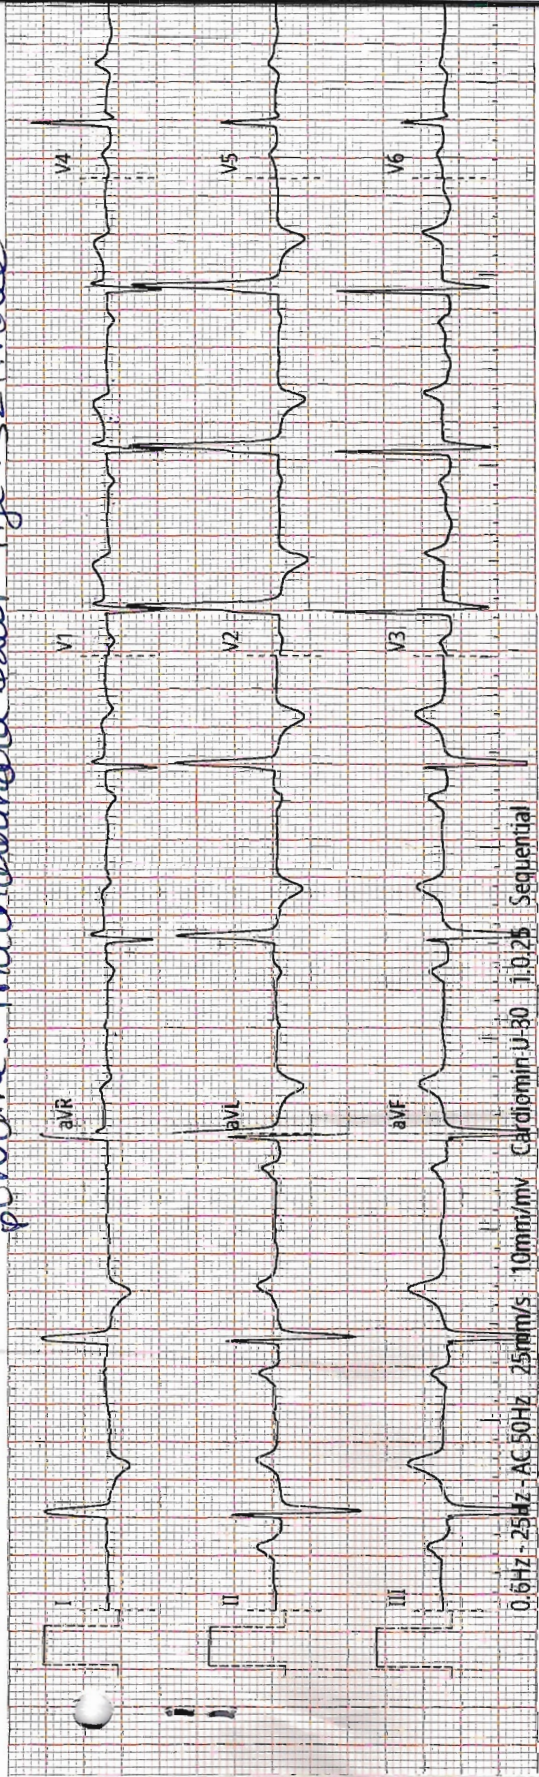

● No Abnormality seen.
