

Patient NAME : Mr THAKUR NEUTY KUMAR

DOB/Age/Gender : 35 Y/Male

Patient ID / UHID : 9669948/OF9669948

Referred BY : Self

Sample Collected : Sep 10, 2024, 07:08 PM

Report STATUS : Final Report

Barcode NO : HQ366054

Sample Type : Whole blood EDTA

Report Date : Sep 10, 2024, 08:10 PM.

Test Description	Value(s)	Unit(s)	Reference Range
------------------	----------	---------	-----------------

**HbA1C (Glycosylated Haemoglobin)**

Glycosylated Hemoglobin (HbA1c) HPLC	5.6	%	<5.7
Estimated Average Glucose	114.02	mg/dl	Refer Table Below

**Interpretation:**

Interpretation For HbA1c% As per American Diabetes Association (ADA)

Reference Group	HbA1c in %
Non diabetic adults >=18 years	<5.7
At risk (Prediabetes)	5.7 - 6.4
Diagnosing Diabetes	>= 6.5
Therapeutic goals for glycemic control	Age > 19 years Goal of therapy: < 7.0 Age < 19 years Goal of therapy: <7.5

**Note:**

1. Since HbA1c reflects long term fluctuations in the blood glucose concentration, a diabetic patient who is recently under good control may still have a high concentration of HbA1c. Converse is true for a diabetic previously under good control but now poorly controlled. 2. Target goals of < 7.0 % may be beneficial in patients with short duration of diabetes, long life expectancy and no significant cardiovascular disease. In patients with significant complications of diabetes, limited life expectancy or extensive co-morbid conditions, targeting a goal of < 7.0 % may not be appropriate

**Comments :**

HbA1c provides an index of average blood glucose levels over the past 8 - 12 weeks and is a much better indicator of long term glycemic control as compared to blood and urinary glucose determinations ADA criteria for correlation between HbA1c & Mean plasma glucose levels.

HbA1c(%)	Mean Plasma Glucose (mg/dL)	HbA1c(%)	Mean Plasma Glucose (mg/dL)
6	126	12	298
8	183	14	355
10	240	16	413

**XRAY**

CHEST (PA)

Both lung fields are normal.

Cp angles are clear.

Hila are normal...

Heart size appears within normal limits.

Soft tissue shadows and bony thorax are normal.

Advised....please correlate clinically.
